# **GEFRAN**

# **CIR-D**GALVANICALLY ISOLATED STRIAN GAUGE TRANSDUCER AMPLIFIER

#### Main features

- Galvanic isolation between the Supply Voltage and the Amplifier >500Vdc
- Linearity error > 0,02% full scale output
- Current output 3-wires
- Low thermal drift < 0,01% full scale/°C
- 10Vdc transducer supply

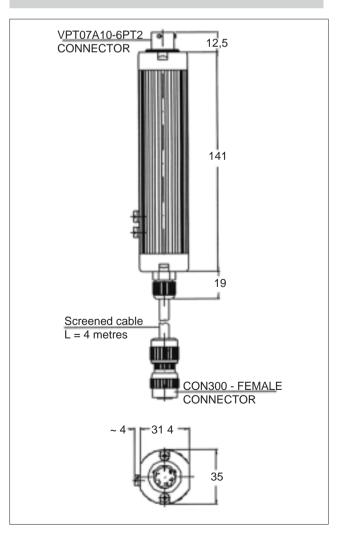

The CIR-D voltage or current amplifiers have been designed to enable the user to adapt non-amplified strain gauge transducers (load cells, pressure transducers) to acquisition systems, PLC, instrumentation with high level inputs. These amplifiers have galvanic isolation between the supply voltage and the transducer to increase the rejection of noise generated by the power supply itself. The availability of the output in current enables the signal to be carried over long distances or used in intelligent automation systems.

# **TECHNICAL SPECIFICATIONS**

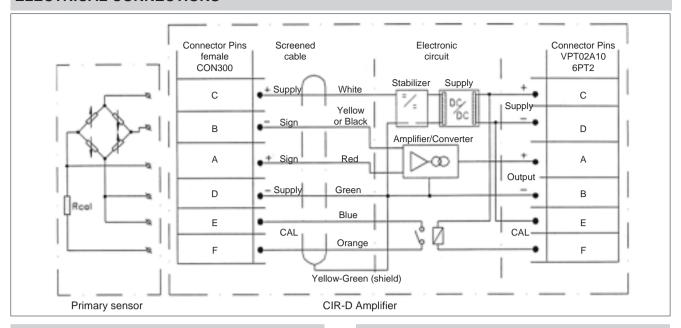

| Linearity error                                     | < 0.02%FSO                          |
|---|-------------------------------------|
| Galvanic isolation between<br>Vsupply and Amplifier | > 500 Vdc                           |
| Primary sensor sensitivity                          | 1 or 2mV/V                          |
| Primary sensor resistance                           | 350Ω                                |
| Output load resistance                              | ≤ 400Ω                              |
| Supply voltage                                      | 2030Vdc                             |
| Current drain with sensor connected                 | < 70mA                              |
| Supply voltage to transducer                        | 10Vdc                               |
| Output signal at zero                               | 0mA                                 |
| Zero signal accuracy                                | ± 0,1%FSO                           |
| Zero adjustment                                     | ± 10%FSO                            |
| Full scale output                                   | 20mA                                |
| Full scale output accuracy                          | ± 0,1%FSO                           |
| Span adjustment                                     | ± 10%FSO                            |
| Inverse polarity protection                         | Yes                                 |
| Response time (1090%FSO)                            | 8ms                                 |
| Output noise (RMS 10400Hz)                          | 0.05%FSO                            |
| Temperature range: Compensated Working Storage      | 070°C<br>-10+80°C<br>-50+100°C      |
| Typical thermal drift of zero                       | ± 0.01%FSO/°C                       |
| Typical thermal drift of span                       | ± 0.01%FSO/°C                       |
| Case material                                       | Anodised aluminium<br>Nylon 66 CF40 |
| Protection degree                                   | IP65 - EN60529                      |

FSO: Full Scale Output (signal at full span).

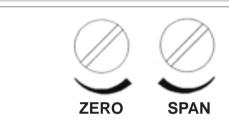

#### MECHANICAL DIMENSIONS

#### **ELECTRICAL CONNECTIONS**

#### **ADJUSTMENTS**

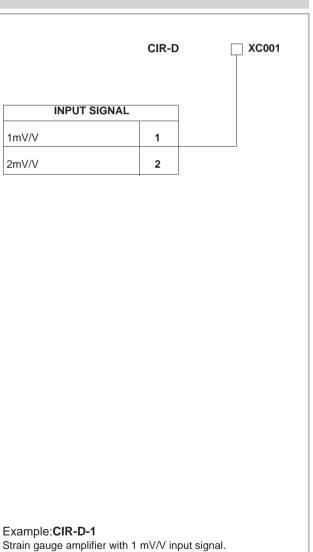

## **ZERO and SPAN POTENTIOMETERS**

The user can adjust the amplifier zero and gain using two potentiometers (ZERO and SPAN respectively) which are easily accessible from the outside by removing two screws present on the case.

# **OPTIONAL ACCESSORIES**

| Connectors   |                              |
|--|------------------------------|
| Female cable connector Grade of protection IP65  | CON 300                      |
| 6-pin connector with 8m (25ft) cable<br>6-pin connector with 15m (50ft) cable<br>6-pin connector with 25m (75ft) cable<br>6-pin connector with 30m (100ft) cable | C08W<br>C15W<br>C25W<br>C30W |
| Other lengths  | consult factory              |
| Cables and assembled cables  | on request                   |
